

MADHAN RAJ D

[AI ENGINEER // DEEP LEARNING ARCHITECT]

MADURAI, IN +91 8098297206 MATHAN2412005@GMAIL.COM GITHUB LINKEDIN

TECHNICAL_CORE

NEURAL_ARCHITECTURES Transformers, CNN, RNN, GANs, Attention Mechanisms, Multi-modal models.	FRAMEWORK_STACK PyTorch, TensorFlow, Keras, HuggingFace, Scikit-learn.
ENGINEERING_OPS Docker, FastAPI, Git, CI/CD, RESTful APIs, Linux/Bash.	LLM_INNOVATION RAG Pipelines, LangGraph, CrewAI, Prompt Engineering, Fine-tuning.

SYSTEM_EXECUTION

AI Specialist Intern @ Codec Technologies	2025 - PRESENT MADURAI, IN
<pre>// Architecting high-performance neural networks for production-scale predictive analytics. // Implementing stateful AI agents using LangGraph to automate complex decision trees. // Optimizing model inference latency for low-latency API responses.</pre>	
Data Science Virtual Intern @ CodeAlpha	SEPT 2025 - DEC 2025
<pre>// Developed and validated computer vision models for specific object detection tasks. // Performed extensive hyperparameter tuning using Bayesian search algorithms.</pre>	

ADVANCED_PROTOTYPES

The Architect: Mini-LLM From Scratch	
<pre>// Engineered a custom Transformer-based model using pure PyTorch. // Implemented multi-head attention, layer normalization, and relative positional encoding. > PyTorch // NLP // Architecture // Transformers</pre>	
Multi-Agent Game Testing Core	
<pre>// Orchestrated an autonomous testing environment where agents identify logic bugs. // Implemented stateful communication protocols between heterogenous AI agents.</pre>	

ACADEMIC_CREDENTIALS

B.Tech Artificial Intelligence & Data Science
Aggregated Score: 80% / 8.0 GPA

MADURAI, IN

EXTRAS: Deep Learning Specialization (Andrew Ng) // Applied AI (Coursera) // Kaggle Contributor // HackerRank Gold.
